

PS-3D

PS-3D: Innova's polystyrene developed for 3D printers filaments.

The new high impact polystyrene (HIPS) line, developed by Innova's renowned Styrenics Technology Center (CTE), brings to the customers the highly strategic option of a 100% Brazilian resin, with competitive costs and logistic advantages in comparison to the imported product.

PS-3D is presented in two grades:

- PS-3D Standard: excellent rigidity balance and impact resistance, indicated for general purpose applications and fast prototyping;
- PS-3D Matte: high impact resistance and matte surface finishing, indicated for pieces and parts design.

Grade

MFI
(g/10 min)

IZOD (kJ/m²)
